

BOOKER T. WASHINGTON NATIONAL MONUMENT

PUBLIC USE REPORTING AND COUNTING INSTRUCTIONS

Following are detailed instructions for collecting and reporting data to be entered on Form 10-157, Revised, Monthly Public Use Report by Booker T. Washington National Monument. These instructions are effective the date of issuance and will continue in effect unless changed by amendment or by memorandum from the Socio-Economic Studies Division to the superintendent approving a requested change.

Each item below describes the procedures to be followed in collecting public use data and summarizing the various elements of those data for entry on the corresponding line on the 10-157, Monthly Public Use Report.

Recreation Visits

1. A pneumatic tube traffic counter is located across the park entrance road leading to the visitor center parking area. The traffic count is divided by 4 to adjust for axle count as well as entering and exiting vehicles. The adjusted traffic count is reduced for nonreportable (traffic count divided by 4 from pneumatic tube counter at the employee lot) and nonrecreation vehicles, and buses/vans (from actual count). The reduced traffic count is multiplied by the persons-per-vehicle multiplier in Table 1.
2. The number of bus/van passengers.

Table 1

Person-Per-Vehicle Multipliers

SEASON	WEEKDAYS
SPRING (MARCH, APRIL, MAY)	2.8
SUMMER (JUNE, JULY, AUGUST)	3.3
FALL (SEPTEMBER, OCTOBER, NOVEMBER)	2.6
WINTER (DECEMBER, JANUARY, FEBRUARY)	2.4

Nonrecreation Visits

The number of nonrecreation visitors is estimated as seven per month.

Recreation Visitor Hours

1. The number of recreation visitors is multiplied by 1 hour.
2. The number of bus and van passengers is multiplied by their length of stay.

Nonrecreation Visitor Hours

The seven nonrecreation visitors stay one hour.

Special Use Data

Line n. Number of tour buses
